

INVITATION

HALL 7 - BOOTH C32

AMB
International Exhibition
for Metal Working
10 - 14 Sep 2024
Messe Stuttgart
Germany

Be there
when we reveal our new
5-axis machining center
in Stuttgart!

AMB 2024 Stuttgart, world of metal working - Welcome to booth C32 / hall 7

The time has come: the FEHLMANN Team is looking forward to presenting our new products and innovations to you at AMB - international exhibition for metal working - from September 10 to 14, 2024. Visit us at booth C32 in hall 7 and experience the unveiling of our new 5-axis machining center!

You will be greeted by live demonstrations, personal expert advice, interesting discussions and, as a **special highlight, our latest developments:**

→ WORLD PREMIERE

Brand new, compact 5-axis machining center from FEHLMANN

for 5-axis simultaneous milling, as well as for machining of simple 5-axis workpieces. Let us surprise you...

→ Exclusively at our booth

VERSA 745 with new automation solution

5-axis high-speed machining center VERSA 745 with new EROWA robot for automation of workpieces up to 150 kg.

Don't miss this opportunity. Our experts are ready to provide you with detailed information and for one-on-one discussions.

See you soon in Stuttgart,
Your FEHLMANN team

FEHLMANN booth C32 / hall 7 also presents the following technologies and solutions:

The latest control technology for excellent productivity - the new HEIDENHAIN TNC7

FEHLMANN CNC machines are available with the intuitive and dynamic HEIDENHAIN control unit TNC7. Operation of the TNC7 is intuitive, task-oriented and customizable. Intelligent functions enhance the familiar HEIDENHAIN programming functions.

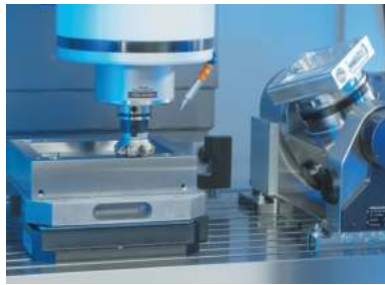

As an official and certified HEIDENHAIN training partner, we offer an extensive array of training courses. Our qualified and experienced team of instructors combine theory and practice. Rest assured: at Fehlmann you receive first-hand competence and expertise.

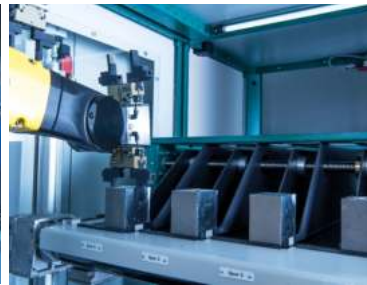

FEHLMANN cutting-edge technology «Made in Switzerland» - convince yourself!

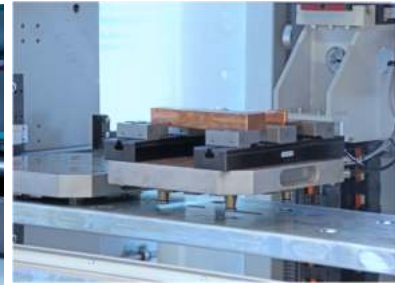

Machining centers in portal design

Machining centers

Robotic parts handling

Automation with pallet handling

Milling / Drilling machines for easy production of single parts and small series

PICOMAX 56 mill - Switch between manual and CNC operation - simple and quick at the touch of a button

The FEHLMANN *mill* version, also ideal for vocational training, offers 3 handwheels and basic functions for conventional milling, drilling and thread cutting

- Machining complex parts easily and economically with the Heidenhain TNC 620, multi-touch control and graphically supported cycles
- Ideal for the production of individual parts and small batches, as well as for practice-oriented, modern training (CNC introduction)
